## Building the Impossible

Restoration & Archiving System  
Full Services

Roaya Company as part of the Group of media Production Group (Bader, Technodyna, Smash Cut & Think) greatly appreciate the success which has been reflected from the past 25 years led to enjoy a good base for excellent communications & developments with all clients. We will always stand on behalf of our achievements and accomplishments to complete what we have started, our responsibilities will never have an end; however, a start is actually the first step for every victory.

Looking at us today makes me believe that the start was right and our moves are taking all risks seriously.

In the face of new opportunities and challenges, we can climb greater mountains with high-quality products, establish prestige, shoulder customers' trust and gain the support of all. We will follow our spirit of "pragmatic, renovations, unity and hard work," make use of advanced technologies, management, and provide efficient services as well as to improve the Luminance bigger title.

**Roaya, Affiliated Companies & Team**

## Company's Archiving Systems Projects & Clients

- 1- Ministry of Finance Archiving System – Kingdom of Saudi Arabia.
- 2- SBG Group – London Archiving System – Kingdom of Saudi Arabia.
- 3- Media Production City's Archiving System – Egypt.

## Technodyna's High-Performance Workflow Solution for Film Restoration

### About Technodyna:

**Technodyna is a media technology solutions provider based in Egypt, offering workflow design, implementation, and consultancy services to broadcasters, post houses, and media archives operating in the MENA region. Their engineering team possesses extensive experience in both the technical and operational aspects of media and film workflows.**

### The Challenge:

**Technodyna faced a critical challenge when a new film restoration center approached them with demanding requirements:**

- 1. Deliver 6 concurrent 4K DPX streams (each stream requiring 1250 MB/s)**
- 2. Achieve a total sustained performance of 8000 MB/s (64,000 Mbps)**

**3.Enable any of the 3 workstations to handle 2 concurrent real-time streams simultaneously**

**4.Provide 500 TB of storage capacity**

**5.Implement the solution within the allocated budget of approximately \$400,000 for storage and related equipment, which was part of a total project budget of \$1,100,000These requirements were particularly challenging given the cost-sensitive market in which Technodyna operates.**

### **The Solution: Accusys ExaSAN**

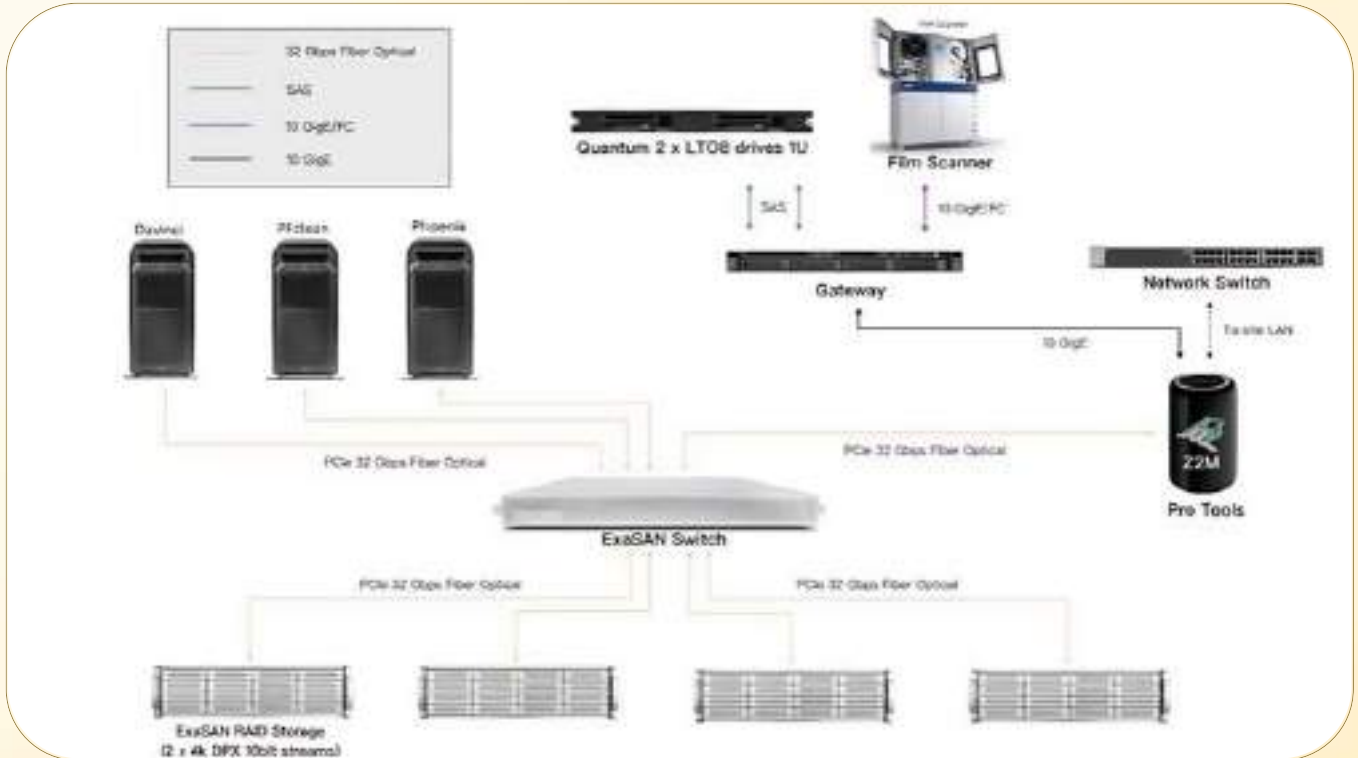

**After extensive market research, Technodyna chose Accusys as their main storage provider. The solution included:**

- 1- 4 x Accusys A16S3-PS storage chassis ExaSAN SW16-V3**
- 2- switch Accusys Z2M PCIe workstation cards for 32 Gb/s connectivity**
- 3-Bluewhale BWFS SAN filesystem**

BADER COMMERCIAL  
INVESTMENT

## Key Components:

**1-Storage:** Accusys A16S3-PS chassis (each capable of 2500 MB/s performance)

**Connectivity:** ExaSAN SW16-V3 switch for high-speed SAN

**2-Workstation Integration:** Accusys Z2M PCIe cards for 32 Gb/s connectivity

**System:** Bluewhale BWFS SAN filesystem for efficient data management

**3-Gateway:** Hyperminds Inc. gateway for connecting additional 10 GigE and 1 GigE clients

## The Benefits

**1-Exceeded Performance Requirements:** Achieved over 9000 MB/s sustained performance, surpassing the client's 8000 MB/s requirement by more than 10%.  
**Cost-Effective:** Met the client's budget constraints while delivering superior performance.

- 1- Scalability:** The solution easily accommodated the 500 TB storage requirement.
- 2- Flexibility:** Successfully integrated high-end workstations (HP Z8) and specialized software (Phoenix, PFClean, DaVinci Resolve).
- 3- Efficient Design:** Compact solution with minimal hardware, resulting in lower power consumption and reduced running costs.

## Client Feedback

Engineer Ahmed Madkour, Technodyna's CEO, stated: "Accusys products are very capable of supplying impressive performance with minimal hardware and at a very reasonable price. Today, we find that Even the older model Accusys storages we supplied to some of our clients five years ago are still meeting clients' needs today."  
**Performance**

## Single Workstation Performance:

- a. Write: 2410 MB/s (49 fps for Full Frame 4K 4096x3112)
- o Read: 2514 MB/s (51 fps for Full Frame 4K 4096x3112)
- b. 4K 4096x3112
- c. Overall System Performance: o Sustained performance: Close to 9000 MB/s when all workstations were tested simultaneously

## Generally

By leveraging Accusys ExaSAN technology, Technodyna successfully delivered a high-performance, cost-effective solution that not only met but exceeded their client's demanding requirements. This case study demonstrates the power and flexibility of Accusys storage solutions in handling complex media workflows, particularly in budget-conscious markets.

## Client's System Archive

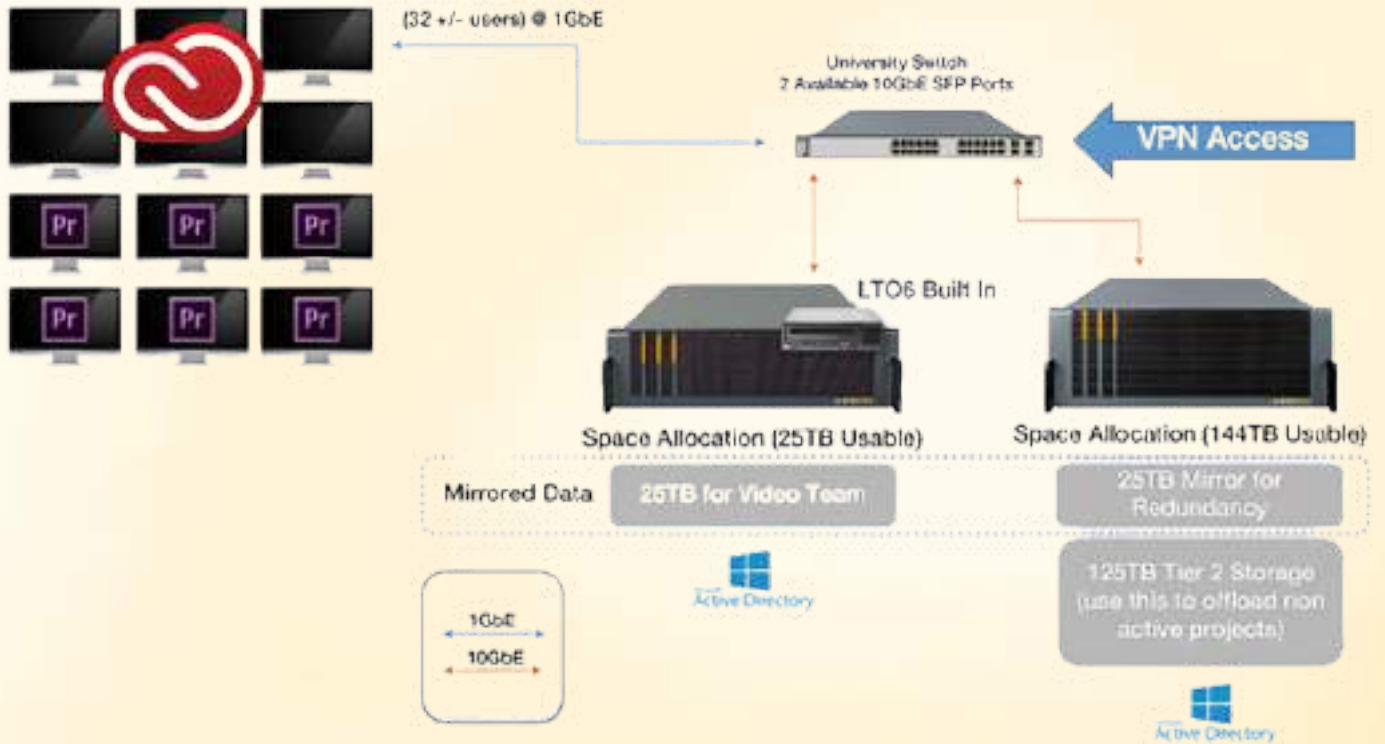

Fast, Accurate and easy work flow

Sequences Implemented as follows:

- 1- Quick notes immediately applied after receiving the memory cards.
- 2- Numbering with dates, days & events if happens.
- 3- Transferring the material with Meta Data.
- 4- Logging the material as proper as it should be.
- 5- Ingesting the material in files as work flow rises.
- 6- Encoding material for later usage.
- 7- Converting material if needed.
- 8- Use key words for search engine use.
- 9- Duplicate the final file on date of the archive.
- 10-Apply safety.

### Ingest

#### Speed Up Your Ingest

Expand your ingest stream capacity and take it to the next level. Deploy directly to your storage for faster ingest to the cloud.

### Manage

#### Your Content Velocity

Monitor content velocity and metadata management to optimize video flow, reduce lag and optimize your overall workflow.

### Edit

#### Create with Ease

Use a collaborative workflow to create content. The BCI Cloud Media Creation™ in Adobe Premiere Cloud makes it so easy.

### Archive

#### Pump Up the Volume

Seamless integration with your existing workflow. Back up and format flexibly, so you can scale your archive and reduce a LOT.

### Transcode

#### No more Waiting

Cloud offload for working copies in Platform. Service content back to your archive.

### Render

#### Offload Renders

Speed up working copies and reduce time waiting for renders. In your workflow, offload renders to the cloud.
